

ARJUN ANAND

Stamford, CT · (203) 832-5650 · arjun.anand.26@dartmouth.edu

EDUCATION

Dartmouth College, Hanover, NH

June 2026

Bachelor of Arts, Double Major in Economics and Mathematics

GPA: 3.99/4.00

Honors/Awards: Phi Beta Kappa Junior Inductee (top 20 students in class), High Honors in Economics, Rufus Choate Scholar (top 5%), Rhodes Finalist, Dartmouth Economic Research Scholar, Neukom Scholar (undergraduate research funding), National Merit Scholar

Selected Coursework: Real Analysis (Honors), Abstract Algebra, Linear Algebra (Honors), Probability and Statistical Inference, Differential Equations, Advanced Topics in Microeconomics, Advanced Topics in Macroeconomics, Advanced Topics in Econometrics

FIELDS OF INTEREST

Macroeconomics, International Economics

WORKS IN PROGRESS

Demography, Human Capital, and Structural Change

- Undergraduate thesis, awarded High Honors in junior year
- Advisor: Treb Allen; Committee Members: Treb Allen, Robert W. Staiger, Andrew T. Levin

This paper examines the role of demography and human capital transmission in shaping structural change during American industrialization (1860–1920). Using linked Census data, I document three stylized facts: (i) young individuals drive the transition to manufacturing; (ii) young migrants prioritize future earnings potential over current wages, whereas older workers prioritize current wages; and (iii) intergenerational income persistence is conditional on remaining in the parental sector. To reflect these findings, I incorporate overlapping generations with age-based preferences and intergenerational human capital transmission into a dynamic general equilibrium economic geography model. After calibrating the model, I conduct counterfactual experiments to quantitatively assess the importance of human capital diffusion and railroads during American industrialization. My preliminary findings indicate that railroads drove the pace of industrialization, whereas intergenerational human capital transmission shaped its geography and reduced spatial inequality.

Cities of Opportunity? Childhood Urban Exposure and Long-Term Outcomes

- Co-authored with Benjamin Williams, advised by Douglas Staiger

We investigate the long-term economic and educational consequences of rural-to-urban migration within the United States during the early twentieth century. Using linked full-count U.S. Census data from 1920 to 1940, we estimate the causal effect of childhood urban exposure on adult outcomes. Exploiting within-family variation in the age at which siblings migrated, we find that earlier arrival in an urban environment significantly improves long-term outcomes. Each additional year of childhood spent in an urban area increases adult income by 0.10 percentiles and educational attainment by 0.46 percentiles. These effects are heterogeneous: the return to education more than doubles for families moving to the largest U.S. cities. We further show that the mechanism of upward mobility depends on local educational infrastructure; urban exposure boosts educational attainment in cities with greater school attendance rates, whereas it increases income in cities with lower schooling rates.

RESEARCH ASSISTANTSHIPS

Economics Department (Dartmouth College), Hanover, NH

Research Collaborator with Professor Andrew Levin

January 2023 – Present

- Conducted joint research on the impact of CEO duality on stock returns for publicly traded U.S. firms
- Cleaned and integrated Fama-French factor return data into a corporate executive dataset using Stata
- Performed probit analysis to assess how CEO duality affects the probability of turnover in various business environments

Research Assistant for Professor Robert W. Staiger

June 2023 – Present

- Evaluated quantitative trade-and-climate model for “International Climate Agreements and the Scream of Greta,” identifying optimal features and parameter calibrations

- Used quantitative model to produce counterfactual results for “Harnessing the World Trading System to Fight Climate Change”
- Utilized LLM tools to link tariff data from GATT negotiations to modern Harmonized System (HS) codes
- Reviewed literature on the China Shock’s labor market impacts for “Reciprocity and the China Shock”

TEACHING ASSISTANTSHIPS

Economics Department (Dartmouth College), Hanover, NH

Teaching Assistant for Capstone Economics Courses

January 2025 – Present

- Guided 40+ senior students in data cleaning & wrangling and creating graphs using Stata
- Assisted students with formulating research questions and refining statistical models

Teaching Assistant for International Macroeconomics (Prof. Nathan Zorzi)

March 2024 – June 2024

- Held biweekly sessions for 30+ students, solved practice problems and provided tailored feedback

Group Peer Tutor for Econometrics (Prof. Steve Mello)

March 2023 – June 2023

- Conducted tutoring sessions for 10+ students

OTHER EXPERIENCES

Goldman Sachs, New York City, NY

Macro Research Summer Analyst

June 2025 – August 2025

- Created a forecasting model to predict the probability of regional home price depreciation
- Analyzed the effect of rising homeowner premiums on home prices for a published report

World Trade Organization (WTO), Geneva, Switzerland

Inaugural Dartmouth-WTO International Economics Fellow

September 2024 – December 2024

- Wrote briefings for the Director-General on economic developments for meetings with world leaders
- Contributed to the October 2024 *Global Trade Outlook*, producing visuals, text, and remarks for the Chief Economist’s press release
- Provided feedback and prepared a presentation for a working paper on pre-accession reforms titled “Committing to Grow: The Full Impact of WTO Accession”

Cato Institute, Washington, D.C.

Economics Research Intern

June 2023 – August 2023

- Co-authored “The ‘China Shock’ Demystified,” an article on the impact of China’s entrance into the world trading system on U.S. labor markets, cited in the 2024 Economic Report of the President
- Analyzed industrial policies for semiconductors and EVs, observing impacts on investment decisions
- Developed and evaluated alternative indicators of government size to substitute for government spending

Dartmouth Economic Research Scholars (DERS)

January 2023 – Present

Leadership Board Member

- Organized events that connected 50+ students with faculty to explore academic careers in economics

Political Economy Project (PEP) Leadership Council

September 2022 – Present

- Planned speaker events related to government and economics

The Dartmouth

September 2022 – Present

Contributing Columnist

- Covered global macroeconomic and geopolitical issues using academic research and economic data
- Published article on the impact of rising interest rates on government finances and private investments

SKILLS

Technical Skills: Stata, MATLAB, Python, LaTeX, Excel

Languages: English (fluent), Marathi (fluent), Hindi (limited proficiency)

Athletics: Captain of Club Tennis Team
